[GTRI Uses Haptic Technology to Enhance VR Military Training](#)

Not just a technology for gamers, virtual reality (VR) is transforming countless industries, including the defense sector. GTRI is utilizing haptics, which draws on people's sense of touch, to make VR military training even more immersive and impactful.

Hybrid Ceramic-Polymer Batteries Offer Safety, High-Performance Potential

Future generations of solid-state lithium-ion batteries based on hybrid ceramic-polymer electrolytes could offer the potential for greater energy storage, faster recharging, and higher electrochemical and thermal stability. Georgia Tech researchers are helping make them a reality.

GTRI Works to Enhance EV Battery Reuse and Recycling in Georgia

Amid the surge in demand for lithium-ion batteries, which power everything from smartphones to electric vehicles (EVs), there is a greater need to properly recycle them. GTRI researchers are working to optimize Georgia's EV battery supply chain to recover and reuse materials from spent batteries.

GTRI's Warner Robins Field Office Wins Top Security Award

GTRI's Warner Robins Field Office is among the organizations receiving national recognition from the Defense Counterintelligence and Security Agency (DCSA). The field office was among 19 facilities to receive a James S. Cogswell Outstanding Industrial Security Achievement Award.
